### Papergrass

Papergrass is a band that enjoys making music and shares that joy with their audience. Their songs are original compositions featuring self-written lyrics and their own arrangements. The musical backgrounds of the individual band members complement each other to create exciting, unique music that defies easy categorization. The musicians of Papergrass draw their inspiration from rock music, mixed with psychedelic, classical, and pop. The result: space rock!

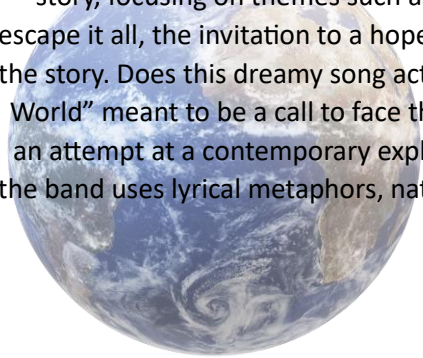

Years of compositional and stage experience have helped Papergrass create unique songs. Following various concerts, radio interviews, and releases, the single “Mrs. Honeybee” was released as a radio edition, accompanied by a music video on YouTube. In 2013, the EP “Papergrass” hit the market. The current album “Eternity” was released in 2018. A concept album that addresses current and polarizing issues of our time—a livable future focused on coexistence. Far removed from ignorance and inhumanity, Papergrass also stands for the vision of a future that values the environment and treats people with respect. Thus, the song “Just Work” is an anthem of liberation from mindless and unhealthy working conditions. The album is available on all major online platforms.

Some of the songs from the album are played by online radio stations both domestically and abroad, including in the Netherlands, the U.S., Ukraine, England, and France. On October 2, 2020, the single “Eternity” was released, a newly arranged version of the song. The accompanying video was filmed in early 2020 at the Olbers Planetarium in Bremen.

Following several lineup changes, Kristina and Marko joined the band in 2025, and Papergrass is currently working on new songs and a live show so they can perform on stage again this year.

### **Vision of „Escape the World“**

“Escape the World” is one of Papergrass’s new singles and also the conceptual centerpiece of their upcoming album. The title itself hints at the central theme: the desire to escape this world. In doing so, Papergrass deliberately leaves room for individual interpretations—whether as an escape from current global political tensions, everyday life, or even from one’s own self. The song tells its own story, focusing on themes such as fears about the future, powerlessness, and self-alienation. To escape it all, the invitation to a hopeful, new underwater world becomes the decisive turning point of the story. Does this dreamy song actually invite us to escape, or are the drifting sounds in “Escape the World” meant to be a call to face the ever-present problems and take action? “Escape the World” is an attempt at a contemporary exploration of the challenges and moods of our present. In doing so, the band uses lyrical metaphors, nature-inspired sounds, and flowing rhythms to bring the concept to life.
